Workshop Jewelry

## ***How to measure your bracelet size***

1. To measure your bracelet size, take a piece of thread and put it around your wrist.
2. Lay the piece of thread out and measure the length that you wrapped around your wrist with a ruler.
3. Look at the chart below to determine your bracelet size.
4. All sizes are in cm.

## ***What happens if the size isn't right?***

Not to worry! For most bracelets, we can provide additional links so that you can lengthen the bracelet. If your bracelet needs to be shortened, all you need to do is send it to us with a note of the correct size.
